Summary

Computer Science student focused on applied AI/ML projects, with growing experience in web development, REST APIs, databases, and data analysis. I use AI tools heavily to learn, prototype, debug, and improve my work while building practical projects with Python, JavaScript, SQL, Node.js/Express, FastAPI, and machine learning workflows.

Experience

LuntiAI

Tagum City, PH

Project Developer (Agritech AI Web App)

May 2026

Crop recommendation web app for Tagum City farming use cases.

- Built a FastAPI-based crop recommendation app using a scikit-learn Random Forest model trained on Philippine crop, soil, and climate data.
- Created a mobile-friendly HTML/CSS/JavaScript interface with barangay soil profiles, weather data, confidence scores, and simple charts.
- Helped prepare the project for deployment on Hugging Face Spaces with prediction, barangay, weather, and health-check endpoints.

[Hugging Face Space](#)

AparTrack

Tagum City, PH

Full-Stack Developer (Rental Management System)

February 2026 - March 2026

Rental management system for admin and tenant workflows.

- Worked on an Express.js and MySQL REST API for tenants, payments, penalties, deposits, utility bills, notifications, audit logs, and reports.
- Added common backend features including JWT login, password hashing, role-based access checks, input validation, and centralized error handling.
- Built vanilla JavaScript frontend pages for admin and tenant users, including role guards, API helpers, dashboard views, pagination, and Playwright UI tests.

Sentisuri

May 2026

Developer (NLP + Frontend)

Sentiment analysis app for English, Tagalog, and Bisaya/Cebuano reviews.

- Built a basic NLP pipeline using TF-IDF features and Logistic Regression for sentiment classification.
- Added code-switching and emoji-aware text processing to better handle mixed-language review text.
- Created a FastAPI service and web interface for entering text, viewing predictions, and inspecting important words.

Projects

SafeSight AI

May 2026

Computer vision class project for detecting PPE safety issues in images and video.

- Trained and tested a YOLO11l object detection model on a construction safety dataset for helmets, vests, masks, people, and violation classes.
- Prepared dataset checks and EDA notebooks using Pandas, Matplotlib, and Seaborn to review labels, class balance, and bounding boxes.
- Built a Gradio demo and OpenCV webcam mode for running image, video, and live-camera safety checks.

Skye Gaming Hub PC Cafe Simulator

June 2026

Discrete-event simulation project for cybercafe PC capacity planning.

- Modeled 56 PC units in SimPy with customer arrivals, solo/group users, waiting time, session length, top-ups, early logouts, and queue abandonment.
- Used Pandas, NumPy, and Plotly to summarize utilization, waiting time, queue length, full-capacity events, and lost demand.
- Wrote project documentation and generated scenario outputs for weekday/weekend capacity planning.

Albion Toolkit

March 2026

Python utility for inspecting game market data and simple player decision support.

- Used Python, Pandas, NumPy, Requests/HTTPIX, and Reflex to fetch, clean, and display market data.
- Built reusable scripts for checking trends and comparing item data.

Education
University of Mindanao Tagum College Bachelor of Science in Computer Science • 3rd Year
Computer Science Mabini Street, Brgy. Magugpo South, 8100 Tagum City, Davao del Norte, Philippines • August 2023 - Present
<https://tagum.umindanao.edu.ph>

Skills
☆ **Programming Languages**
Learning / Working Knowledge
Python, JavaScript, TypeScript basics, SQL, HTML, CSS
☆ **Applied AI & Data**
Focus Area
Scikit-Learn, Pandas, NumPy, Basic NLP, Random Forest, Logistic Regression, YOLO/Object Detection, SimPy, AI-assisted development
☆ **Backend & Cloud**
Learning / Project Experience
Node.js, Express.js, FastAPI, REST APIs, JWT Auth, RBAC basics, Render, Hugging Face Spaces
☆ **Databases & Storage**
Learning / Project Experience
MySQL, PostgreSQL, MongoDB, SQLite, Sequelize
☆ **Frontend, Testing & Tools**
Learning / Project Experience
HTML/CSS, Vanilla JavaScript, React basics, Gradio, Plotly, OpenCV, Playwright basics, Jest basics, Git/GitHub

Languages
English
Working Proficiency
Tagalog
Native
Bisaya
Native
